

The logo for Crevavi, featuring the word "Crevavi" in a bold, teal, sans-serif font. The letter "C" is significantly larger than the other letters and is partially enclosed by a white semi-circle on its left side. To the left of the logo, there are four horizontal bars of varying shades of teal and cyan, stacked vertically and extending from the left edge of the frame towards the logo.

Crevavi

Create, Embed, Empower

Crevavi Konnect (IoT)

Success Stories

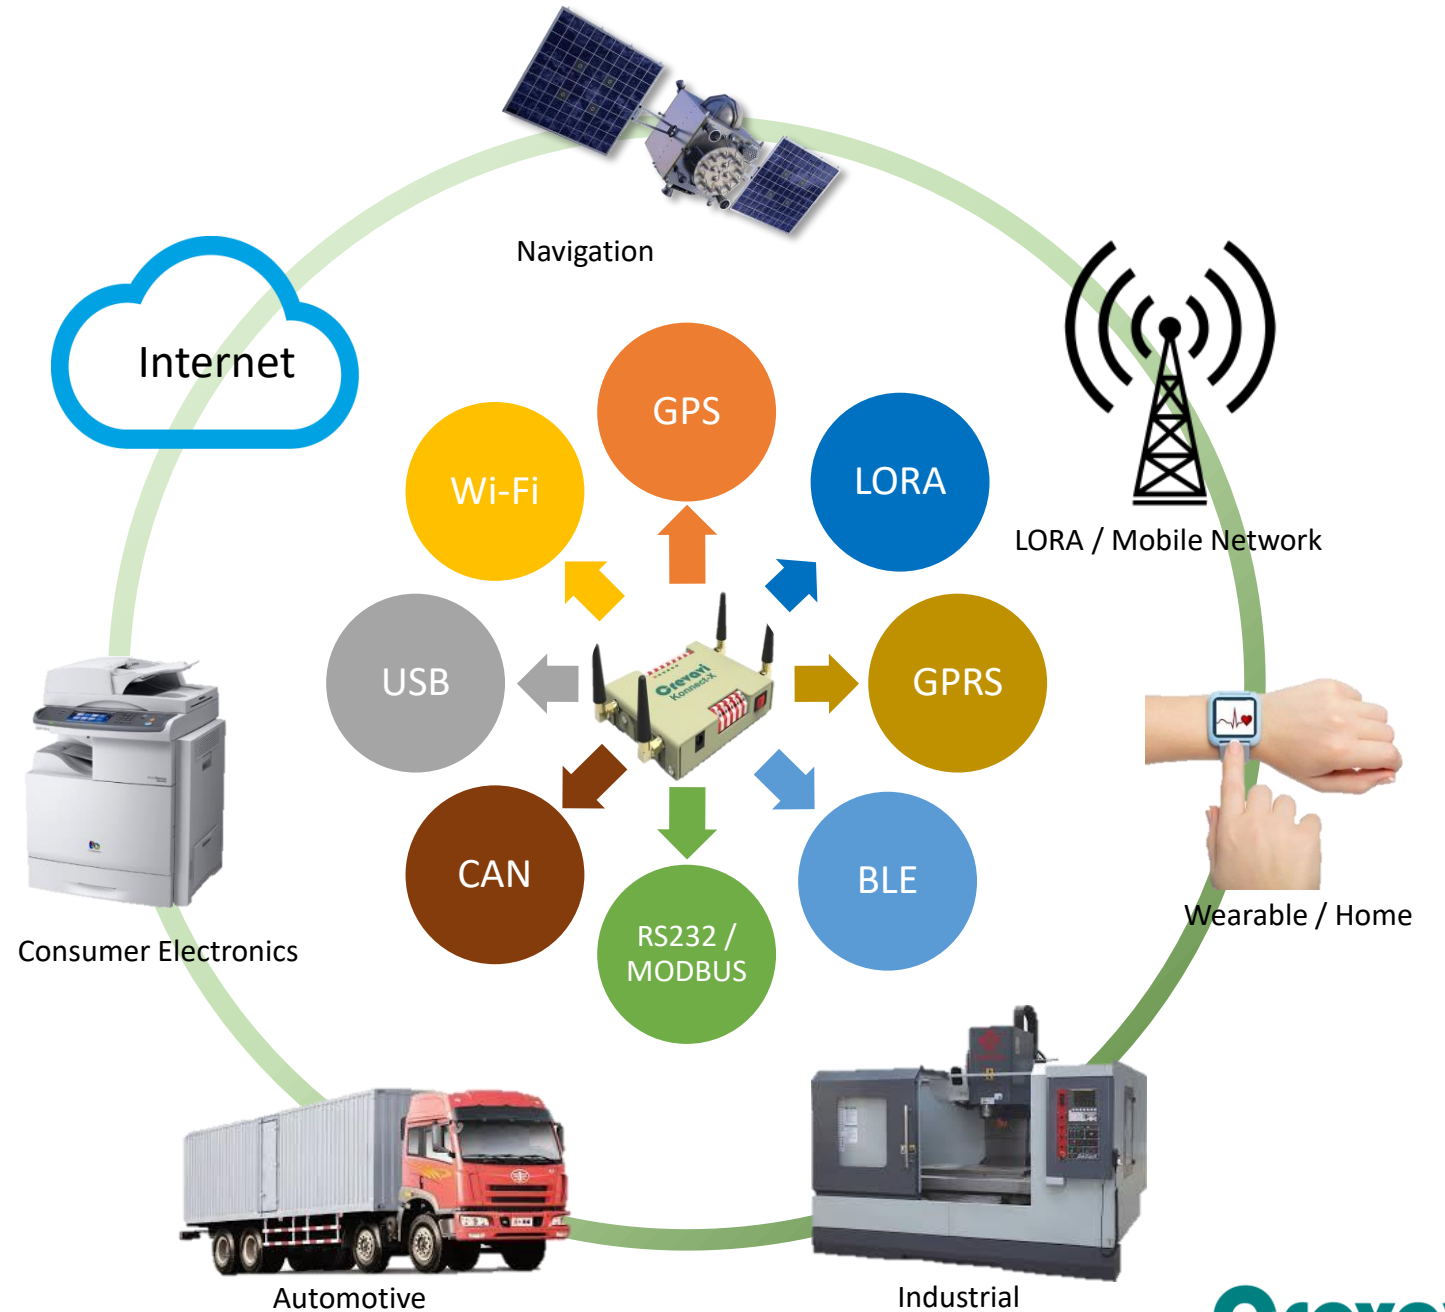

IoT Offerings

- Upstream

- GPRS
- Wi-Fi
- LORA
- Bluetooth
- GPS

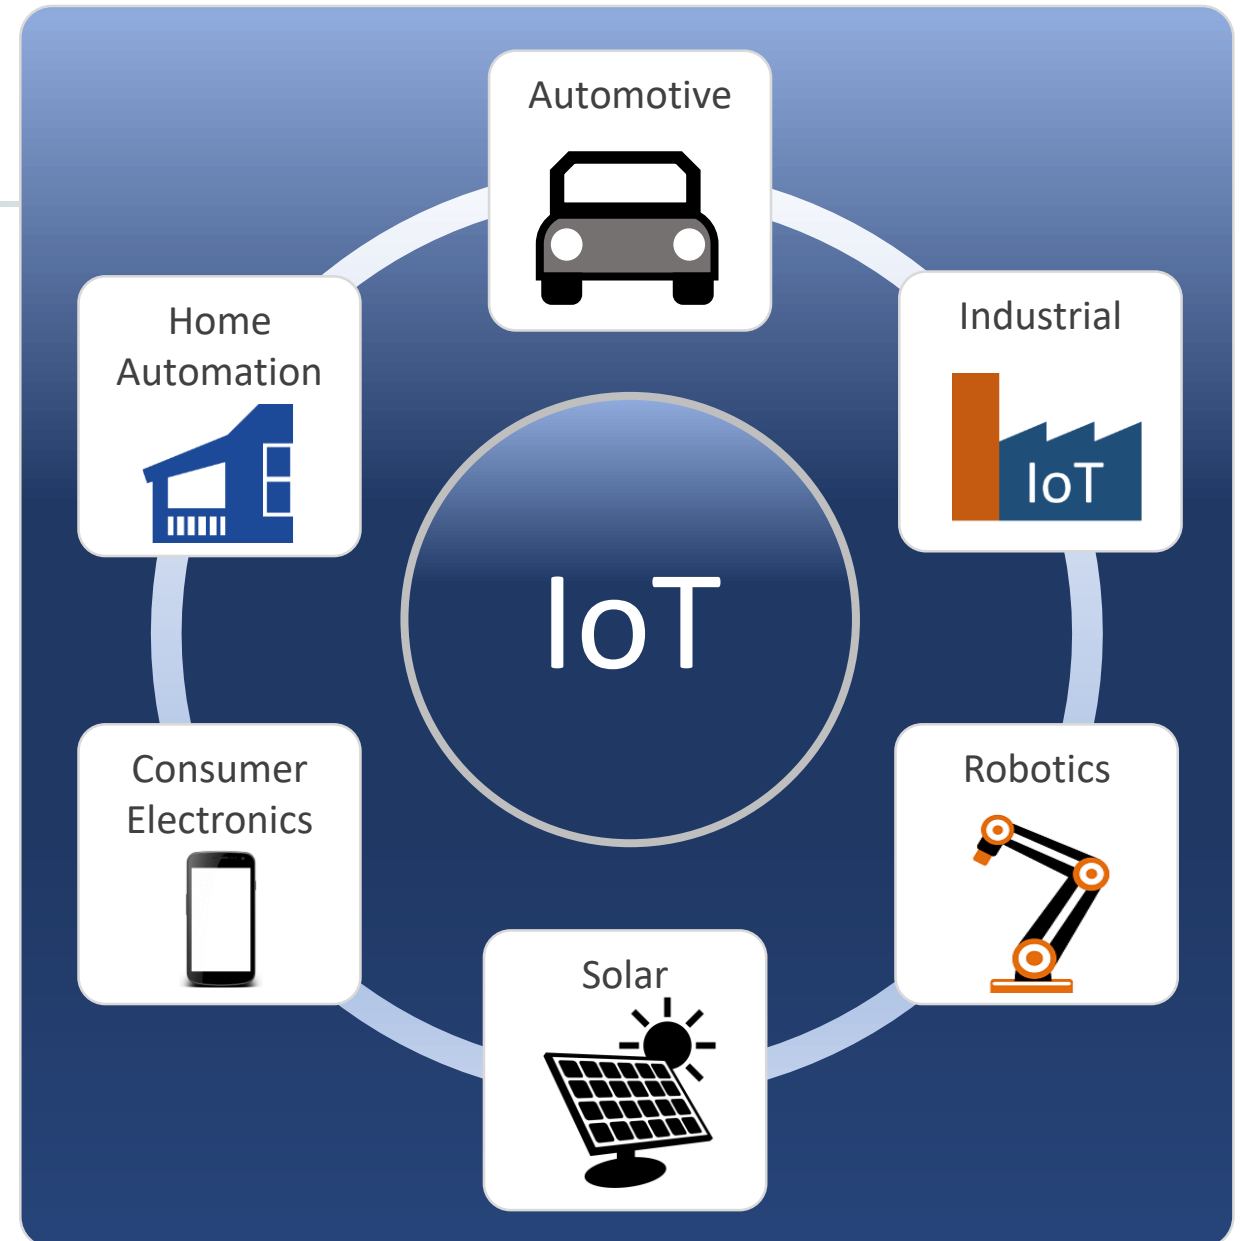

- Downstream

- CAN
- RS232, Modbus
- USB
- Custom Digital / Analog Sensors
- Bluetooth

Domains

- Decades of industry experience in developing embedded products for Machine-to-Machine communication, and IoT domain
- Proven products in the domain of
 - Industrial IoT
 - Telematics, Automotive OBD-II
 - Home Automation
 - Consumer Electronics
 - Solar charging, monitoring
 - Robotics

Case Studies

Konnect-Wi (Industrial IoT)

Power Meter Monitoring

- Modbus interface to read electric meter readings
- Sends data through Wi-Fi (MQTT) to a local server
- User monitors voltage, current, power consumption of multiple meters from a central server

Customer: ITC

Level sensor Monitoring

- Analog 4-20mA input from level sensor
- Sends data through Wi-Fi (MQTT) to a local server

Customer: Machtatz, Sapcon

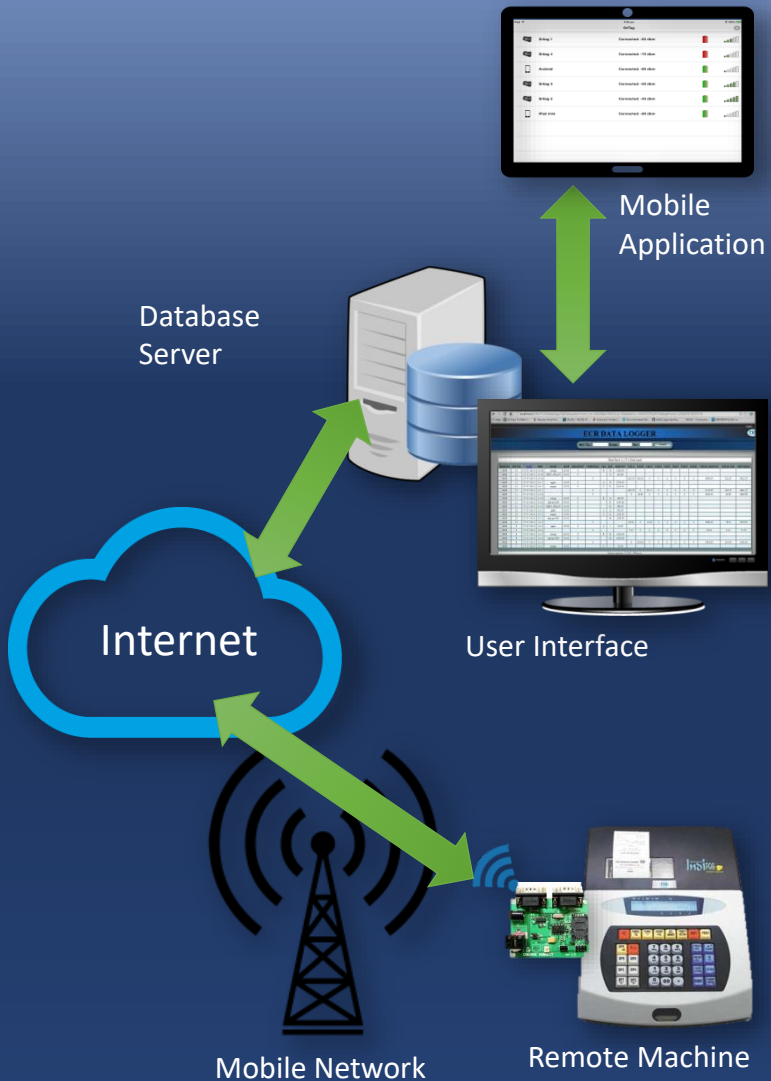

Industrial equipment monitoring

- Various digital and Analog inputs from switches and sensors
- Connected to industrial printing machines
- Modbus interface with HMI device

Customer: Alteem

Konnect-B (Industrial IoT)

Compressor Monitoring

- Modbus interface to read Compressor parameters from HMI
- Sends data through GPRS (HTTPS) to a SAP HANA server
- User monitors voltage, current, pressure, temperature of the machines

Customer: Bosch

POS and Weighing Bridge transaction monitoring

- RS232 input from POS and weighing bridge controllers
- Sends transaction data to a central server through GPRS
- Sends SMS to owner on each transaction / as configured

Customer: Orion Automations, TVSE

Multi-Function Printer (MFP) Tracker

- USB host interface to talk to MFP – capture number of pages printed, toner level, errors
- Printer data logged in a central server, and business logic built for billing, support, service.
- Owner can also shut down the printers from server

Customer: WeP Peripherals

Telematics, OBD-II

Konnect-G – Tracking

- GPS location tracking
- Sends data through GPRS (MQTT) to a central server

Customer: Telematics4u

Konnect-SCAN – GPS + CAN (OBD-II)

- CAN interface with vehicle OBD-II port – capture engine information
- GPS for location tracking

Customer: Skanray, Telematics4u

Software development for vehicle access control

- Custom hardware of client for vehicle immobilizer
- Interface with a telematics device to track location
- Interface with engine to immobilize
- GPRS Interface with a central server to authenticate user, mobilize, immobilize
- Bluetooth interface with smart-phone

Customer: Telematics4u

Blueport

Blue-port OBD-II

- CAN to Bluetooth adapter for OBD II diagnostics
- Android application
- Scalable HW and SW to support client specific configurations
- Compact and sleek form-factor

Customer: Spark Minda

Blue-tag

- Bluetooth Low Energy tags for sensor data acquisition and proximity monitoring
- Android application

Customer: Fourbros

Benefits to target customers: OEMs

- Portable, Configurable, Modular & Flexible design to add/modify features with minimum TTM
- State of the art product at economic cost, low form factor
